Privacy Policy

Local Market · locamarket.in · Effective 26 October 2026

This policy explains what information Local Market collects when you use our website **locamarket.in** and our Android apps (**Local Market** for customers, **V Local Market** for shop owners and **S Local Market** for field staff), why we collect it, who sees it, and the choices you have. You can read it without signing in.

In short. We use your details to show you shops and offers near you, take and deliver your orders, and run the service. We do not sell your personal information and we do not use advertising networks. (Shops on Local Market may show their own ads in the app; those ads do not receive your personal details.) You can ask us to correct or delete your information at any time at info@locamarket.in.

సారాంశం (తెలుగు): మీ దగ్గరలోని షాపులు, ఆఫర్లు చూపించడానికి, ఆర్డర్లు తీసుకుని అందించడానికి మాత్రమే మీ వివరాలను వాడతాము. మీ వ్యక్తిగత సమాచారాన్ని అమ్మము, ప్రకటనల నెట్‌వర్క్‌లకు ఇవ్వము. మీ వివరాలు సరిచేయాలన్నా, తొలగించాలన్నా info@locamarket.in కి రాయండి. పూర్తి నియమాలు కింద ఇంగ్లీషులో ఉన్నాయి.

1. Who we are

Local Market is a local shopping service that connects customers with nearby shops and service providers. In this policy, “we”, “us” and “Local Market” mean the operator of locamarket.in and the apps listed above. Contact: info@locamarket.in.

2. Information we collect

If you shop as a customer

- **Account:** your email address and a password (handled by Google Firebase Authentication; we never see your password), and the name and language you choose.
- **Location:** the town, pincode and address you choose, and, only if you allow it, your device’s approximate or precise location (GPS). We use it to show shops, products, offers

and ads that are meant for your area, how far each shop selling an item is from you, and the road to a shop. You can refuse or withdraw this permission in your device or browser settings and choose a place by hand instead.

- **Orders:** the items you order, your delivery address and pincode, the payment method you choose, and the order status. We do not collect or store card numbers. If you choose to save a card for display, only the card brand and the last four digits are kept.
- **Things you save or write:** your wishlist, reviews and ratings, and messages in complaints you send.
- **Notifications:** if you turn notifications on, a device notification token and your chosen area, so we can send price drops, offers and order updates.

If you are a shop owner (V Local Market)

- Your name, email, phone number, shop name, category, address, pincode and description.
- The shop's GPS location, a photo of you and a photo of the shop (kept private; seen only by you and our administrators while we review your application), and the shop photos, products, prices, stock, offers and ads you add.
- Once we approve your shop, customers see its name, photo, address, phone number (so they can call you), location on the map, and your items and prices, so they can compare shops and find the way to you.
- If our field staff add your shop for you (you do not need an account), they record the shop name, your phone number, the address and the shop's GPS location, three photos of you or the shop, and the items you sell with their photos and prices. Our administrators check them before anything is shown. Once approved, customers see the shop name, photos, address, phone number, location, items and prices.

If you offer a service (service provider, in the V Local Market app)

- Your name, email, mobile number, a photo of you, the service you offer and your charge per hour, and your house address and GPS location (for our review).
- Once we approve you, customers see your name, photo, service, charge per hour, mobile/WhatsApp number, your town and an approximate location (about 1 km) so they can find and call you. Your house address and exact location are not shown to customers.
- If our field staff add you (you do not need an account), they record your name, mobile number, service, charge per hour, the GPS location where they add you, an address and

two or three photos of your work. Customers see the same as above, with the photos of your work instead of a photo of you.

If you are field staff (S Local Market)

- Your name, email, phone number and a registration photo, and the shop and item details (including photos and the place you add them from) that you submit.
- Your location (GPS) when you register, and the area and pincode worked out from it. Your Staff ID is made from that pincode. Only our administrators see this location.

Collected automatically

- **Visit and ad statistics:** a random identifier created on your device (not linked to your name), whether you use the website or the app, your chosen town, and whether an ad was on screen for at least a second or was tapped. We use this to count visits and to report to advertisers how many people saw an ad. We do not count views by the advertiser themselves, our staff or automated programs.
- **How the apps are used:** which screens and buttons are used, what is searched for (and searches that found nothing), calls, WhatsApp messages and directions to shops and service workers, offers and ads tapped, the town chosen, and whether a notification was opened. We keep these as daily counts. When you are signed in, we also keep your own daily counts, so our administrators can see how each account uses the service, and when your account was last active. Shop owners, service providers and staff see only the totals for their own shops, services and the vendors they added (for example, how many calls a shop got), never who made them.
- **App problems and speed:** when an app has an error or crash, a short description of it (with emails, links and long numbers removed), and how long the app took to start.
- **Google Analytics (website):** on our website, Google Analytics counts visits and the pages and buttons used, with a random identifier stored in your browser. We have turned off Google signals and ad personalisation, so it is not used for advertising or to guess your age or gender, and we do not send it your name, email, phone number or account id.
- **Local storage:** your device or browser keeps small settings (language, chosen place, shopping bag, the random identifier above) so the service works the way you left it.

3. How we use information

- To run the service: show products, shops, offers and ads for your area, take orders, tell shops what to deliver, and show order status.
- To check and approve shop owners, staff, photos and ads, and to keep the platform safe from fraud and misuse.
- To send notifications you asked for, and messages about your orders and complaints.
- To count visits and ad views, report to advertisers, and improve the service.
- To see which parts of the service are used, find what customers search for but cannot find, show shop owners, service providers and staff their own numbers, and find and fix errors and slow screens.
- To follow the law and protect our rights.

4. Who we share it with

Who	What and why
The shop(s) that fulfil your order	Your name, delivery address, phone (if you give one), the items ordered and the payment method, so they can prepare and deliver the order.
Customers	For a service provider: the name, photo, service, charge per hour, mobile/WhatsApp number, town and approximate location shown on the service, so customers can contact the provider.
Google (Firebase and Google Cloud)	Our service providers: sign-in, database, file storage, notifications, hosting and server functions. Your data is stored and processed on their servers, which may be outside India.
Google Analytics	On the website only: visit and usage counts as described in section 2, without your name, email, phone number or account id, with Google signals and ad personalisation turned off.
Google Cloud Vision	When a photo sent by a shop owner, a service provider or our field staff is reviewed (by our administrators, or automatically before a field staff member's addition goes live), the photo may be sent to Google Cloud Vision, which says whether the same picture is already on the internet. Only the photo is sent, not your name or contact details. We also keep a fingerprint of reviewed photos to notice the same photo being used again.

OpenStreetMap services	Map pictures, place-name lookups and routes. Your device requests map tiles, and the coordinates of a place you pick may be sent to look up its name. When you open a shop on the map, your location and the shop's are sent to the OSRM route service (based on OpenStreetMap) to draw the road between them; nothing else about you is sent.
Google Fonts	Fonts used on the website are loaded from Google, so your IP address is visible to Google when the page loads.
Shop owners, service providers and staff	Only totals for their own shops, services and the vendors they added: calls, WhatsApp messages, directions, items and price changes. Not who made them.
Advertisers	Only totals (views, taps, by town and by day). Not your name or contact details.
Authorities	When the law requires, or to protect people and our rights.

We do not sell your personal information, and we do not share it with third parties for their own advertising.

5. How long we keep it

We keep your account and order information while your account is active and as long as needed for orders, complaints, accounts and legal duties. Per-view ad records are kept so that advertisers' numbers can be checked. Photos of shop owners and staff are kept while their account is active. Daily usage counts are kept as totals; your own daily counts are kept for up to 400 days. If a customer account is not used for a long time (for example 30 days), we may disable it, and if it then stays unused (for example 90 days in all), we may delete it with its personal information; orders are kept as the law requires. Shop owner, service provider and staff accounts are not deleted this way. When you ask us to delete your information (section 8) we delete or anonymise it, except what we must keep by law.

6. Security

Data is sent over encrypted connections. Access to personal information is limited to the people and systems that need it, and administrator access needs a password and a one-time code. No system is perfectly secure, so we cannot promise absolute security.

7. Children

Local Market is not meant for children under 13, and we do not knowingly collect their personal information. If you believe a child has given us information, write to us and we will delete it.

8. Your choices and rights

- **Access and correction:** you can see and change your name, language, address and saved details in your account. For anything else, write to us.
- **Deletion:** see how to delete your account and data, or email info@locamarket.in from the address you signed up with, with the subject "Delete my account". We will confirm and delete your account and personal information, and aim to complete this within 30 days.
- **Location:** turn it off in your device or browser settings at any time; you can still choose a place by hand.
- **Notifications:** turn them off in the app or in your device settings. We count whether a notification was opened, to know which ones are useful.
- **Google Analytics:** you can block it with your browser's privacy settings or an add-on; the website works the same without it.
- **Complaints:** write to us first; we will try to put things right.

9. Changes to this policy

If we change this policy we will put the new version on this page with a new effective date, and tell you in the app or by email if the change is important.
